

PARASITE EVALUATION CLINIC

Wednesday, June 27th at Noon

Beaman Elevator

Detriments of High Parasite Loads:

- Suppressed Immune System
- Low Conception Rates
- Reduced Weaning Rates

Cattle, Sheep, and Goat Producers:

Mid-Iowa Cooperative, partnered with Merck Animal Health and Hubbard Feeds, will be offering a free Livestock Parasite Evaluation Clinic to determine the parasite load in your herd and the efficacy of your current deworming strategies.

If you would like to participate and have your livestock tested, simply bring fresh 3 gram (golf ball size) fecal samples to the Co-op for a free evaluation. The supplies needed to collect the samples will be furnished by Merck and will be available for pick up at the Beaman Elevator by June 20th. If you cannot get samples, we would be more than happy to send someone out to collect them for you!

Please plan on coming by for lunch and a discussion on your sample results on June 27th at noon. Results will be completed throughout the clinic. If yours are not completed, you will be notified of results after the clinic.

For questions or more information contact Mid-Iowa Cooperative at (641) 366-2740 or Anthony Monroe, Merck Animal Health at (515) 689-5275.

MID IOWA
COOPERATIVE
GOOD LAND. GOOD PEOPLE. GOOD ADVICE.
